

**It's Like a Check-up For Your Data Center.
Except, We Make House Calls.**

Data Center Evaluation Overview

Has your company experienced continued growth in the amount of data you use and store? Are you wondering how cost effectively to scale your data center architecture and data storage needs while minimizing the risk to your organization? Have you recently acquired a new data center and are concerned with integration into your IT organization? Are you in the midst of a data center migration, upgrade, or move to virtualization and need to ensure these changes happen seamlessly?

Managing your data is one of the most important IT system controls in organizations, today. And yet, many companies are in the dark about the effectiveness and efficiency of their Data Center operations across the organization.

VMC Consulting's Data Center Evaluation takes the guess work out of assessing the health of your Data Center. Using a proprietary 50 point inspection process, we help companies evaluate every critical component of their Data Centers, ranging from security to temperature controls, equipment to networking, and air handling to capacity planning. The Data Center Evaluation will help you determine the operational health of your Data Centers, ensure compliance with NEC and other governing bodies, and improve efficiency, capacity and controls. The VMC Consulting Data Center Evaluation also uncovers new opportunities for process improvements, and leads to faster on-boarding of new Data Center staff, less rework, and reduced operating costs.

Led by Senior Data Center Specialists trained in expert project management execution, our Data Center Evaluation is a four part process spanning approximately two weeks from initial interview to final report deliverable.

Part 1: Interviews

Part 2: Site Tour

Part 3: Process and Operations Analysis

Part 4: Findings and Recommendations Report

Your organization will come away with a detailed Findings and Recommendations Report detailing each aspect of your Data Center, with actionable recommendations for improvement. Let VMC Consulting help you ensure your Data Center is operating efficiently, cost effectively, and in compliance today.
